Your paper listed in this e-mail has been accepted for publication in the RSL. You will be getting instructions from the editor and later from the typesetters about what happens next. In addition, you should know that soon after you upload the final files (as directed by the editor) and return the copyright form (as directed by the typesetters), your version of the paper will be published online as submitted (before copy-editing or typesetting). At this point, the article will have a DOI and be considered published and citable. You will be informed of the DOI once available. Subsequently you will receive a proof of your typeset, edited article, which will eventually replace the accepted manuscript online and be considered the final version of record.

Journal: Review of Symbolic Logic
Submission type: Paper
Editor: Andrew Bacon - ajbacon2@gmail.com
Title: Modal Quantifiers, Potential Infinity, and Yablo sequences
