

.5 credible interval: (.79-.95)
(posterior of 5 heads in 5 tosses with uniform prior)

.5 highest posterior density interval: (.89-1)
(posterior of 5 heads in 5 tosses with uniform prior)

.5 credible interval: (.33-.66)
(bimodal distribution with modes at .4 and .5)

.5 highest posterior density intervals: (.33-.47) and (.52-.67)
(bimodal distribution with modes at .4 and .5)
