$$f(k) = \binom{n}{k} p^k \left(1 - p\right)^{n-k} \tag{1}$$

This is a citation (Diamond, 1990) which uses keys from the bib file listed in the preamble.

Equation  $(1)^1$ 

Note that chapter files are found and compiled automatically, but the file names have to contain chapter numbers first. For instance, we used O1-intro.Rmd, placed in the same folder. Observe how we included r code inline.

### Chapter 1

### Introduction

You can label chapter and section titles using {#label} after them, e.g., we can reference Chapter 1. Let's use chapter labels starting with "ch:".

Figures and tables with captions will be placed in figure and table environments, respectively.

```
par(mar = c(4, 4, .1, .1))
plot(pressure, type = 'b', pch = 19)
```

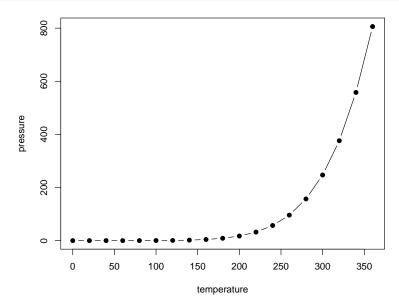

Figure 1.1: Here is a nice figure!

Reference a figure by its code chunk label with the fig: prefix, e.g., see Figure

Table 1.1: Here is a nice table!

1.1. Similarly, you can reference tables generated from knitr::kable(), e.g., see Table 1.1.

```
knitr::kable(
  head(iris, 20), caption = 'Here is a nice table!',
  booktabs = TRUE
)
