Distances of the joint LR from the individual LRs (positive support)
Still, 70% of joint LRs between the individual ones (DAG2)

Compared to the maximum
Assuming $LR_A, LR_B > 1$

Compared to the minimum
Assuming $LR_A, LR_B > 1$

density

$LR_{AB} - max(LR_A, LR_B)$

$LR_{AB} - min(LR_A, LR_B)$
